Anterior Knee Pain reduction by patellar thickness reduction in Total Knee Replacement

Published On: August 07, 2019 | Pages: 011 - 014

Author(s): Choochat Kantayaporn* and Teerachai Pueimpanich

Background: Anterior knee pain(AKP) was a common complication after total knee replacement(TKR). This condition can be occurred in both patellar resurfacing and non-resurfacing technique. An increase in patellar thickness 1 mm or more postoperatively was associated with lower gain in WOMAC score. ...

Vitor Quality of Life Scale for the elderly: Construction

Published On: May 15, 2019 | Pages: 001 - 008

Author(s): José Vitor da Silva*, Makilim Nunes Baptista

The objective of this study was to describe the conceptual model and construction of the Vitor Quality of Life Scale for the

Elderly (VITOR QLSE). The following approaches were employed to devise and incorporate new items and dimensions into the scale: qualitative study, literature review, focus group and pre-test performed in 30 older adults. The VITOR QLSE was const ...

Hypoglycemia and overtreatment of diabetes in elderly subjects: observations from 3 studies over a period of 12 years

Published On: November 06, 2019 | Pages: 015 - 019

Author(s): Martial Coutaz*

Purpose: Despite recent new recommendations from professional societies regarding the management of diabetes in older adults, it is clear that in routine practice, treatment targets are often ill-suited to the health state of polymorbid elderly diabetic patients. ...
