My Child Doesn't Need to be Vaccinated Because We Lead a Healthy Lifestyle: Compensatory Health Beliefs Predicting Intentions and Reported Child Vaccination

Published On: October 29, 2015 | Pages: 022 - 025

Author(s): Efrat Neter*, Bat-El Levi and Sharon Miller

Background: In the past two decades negative attitudes towards vaccination has surfaced among parents. These concerns are related to safety, adverse effects, lifestyle and religious issues. The present study focuses on compensatory health beliefs (CHBs), the beliefs that the adverse consequences of one health behavior are compensated by another health behavior, and ex ...

Prevalence and Correlates of Family Meals among Families of 3rd Graders

Published On: September 24, 2015 | Pages: 007 - 011

Author(s): Susan L Davies*, Kathleen F Harrington, Kevin Fontaine, Richard M Shewchuk, Michael Windle and Frank A Franklin

Introduction: Dietary intake has a significant role in promoting health and preventing disease. Family meals have been associated with higher nutrient intake, lower obesity rates, and other social benefits, yet little is known about what influences family meal frequency. ...

The Conflation of Health and Healthcare

Published On: July 05, 2015 | Pages: 006 - 006

Author(s): Gareth Morgan*

Health is difficult to define while healthcare relates to the various services available. Recent election campaigns within the United-Kingdom seemed to conflate the terms health and healthcare. ...
