Effectiveness of 4th doses of bivalent mRNA vaccine in reinfections from October 2022 to October 2023 in a general medicine office in Toledo (Spain)

Published On: March 14, 2024 | Pages: 001 - 006

Author(s): Jose Luis Turabian*

Background: The effectiveness of the COVID-19 vaccine in preventing reinfections is uncertain and there is little community-level research published at this time. Objective: To compare the cases of COVID-19 reinfections in vaccinated versus not vaccinated 4th dose people with bivalent mRNA vaccines and assess the effectiveness of this vaccine booster. Methodology: A ...
