Diagnosis from an Epidemiological Point of View. The Example of COVID-19

Published On: October 08, 2024 | Pages: 018 - 021

Author(s): Jose Luis Turabian*

A diagnostic test is anything that provides data about the patient's health or disease. All such tests can be formally evaluated for their accuracy and precision (sensitivity and specificity). Once a test has been performed, whether positive or negative, sensitivity and specificity are not the priority issues; the physician's dilemma is whether or not the patient has

...

Next-Gen Surgery: AI Robots Leading the Way in Healthcare

Published On: October 05, 2024 | Pages: 013 - 017

Author(s): Saman Aisha*

As human generations evolve, medical science and engineering have developed, and robotics have become an integral part of medicine from administrative duties to surgical procedures. In medical procedures, robotic systems support and enhance the accuracy and agility of human surgeons. This method is known as robotic surgery or robotic-assisted surgery (RAS). In the pub ...
