## Walking Distance to Tobacco Outlets in Vulnerable Areas Baltimore City: An Issue of Health Equity

Published On: September 26, 2017 | Pages: 088 - 091

Author(s): Aruna Chandran\*, Christian Fuller, Emilie Gilde

Introduction: Health equity concerns related to tobacco use are significant in Baltimore City. We use spatial analytic techniques to understand the density of tobacco outlets by areas of socioeconomic vulnerability, and their location within walking distance of residences compared with vehicle ownership. ...

## Healthful School Environment: A Comparative Study of Public and Private Primary Schools in Ogun State, Nigeria

Published On: August 24, 2017 | Pages: 062 - 070

Author(s): Amoran OE\*, Kupoluyi OT, Salako AA and kupoluyi OT

Introduction: A healthy school environment (physical, biological and socio-cultural) serves as a major determinant of health and greatly influences the individual's level of intellectual growth and development. This study was therefore designed to assess the school environmental health services in both private and public primary schools in Ogun state Nigeria. ...

## Under-Five Mortality in India: A Muddled Trip through Millennium Development Goal - 4

Published On: June 28, 2017 | Pages: 048 - 053

Author(s): Paramita Sengupta, Purushottam A Giri\* and Sadhu C Mohaptra

The Millennium Development Goal-4 (MDG-4) had a target of reducing the under-five mortality rate (U5MR) by two-thirds, between 1990 and 2015. When compared to 1990 levels, 17,000 fewer children died each day in 2015. In 2012, UNICEF found that, globally, children born in the poorest 20% of households had only half the chance of surviving to their fifth birthday as ...

### **Short Communication**

## **Don't We Need Non-communicable Diseases Block in Government Tertiary Care Hospitals?**

Published On: September 23, 2017 | Pages: 085 - 087

Author(s): Sumanth Mallikarjuna Majgi\*, Purushottam A. Giri and Bhavani Nivetha

Non-communicable Diseases (NCDs) are emerging as the major cause of morbidity and mortality globally. In India, non-communicable diseases (NCDs) contribute to around 5.87 million deaths that account for 60% of all deaths. India shares more than two-third of the total deaths due to NCDs in the South-East Asia Region. ...
