Hemoglobin genotype variants and Plasmodium Falciparum malaria in children receiving postpartum care at Faith Alive Foundation Jos, Plateau State, Nigeria

Published On: November 23, 2022 | Pages: 147 - 151

Author(s): Njila HL*, Idoko JE, Ombugadu A and Zakari H

More and more data are showing a link between hemoglobin genotypes and Plasmodium falciparum malaria. In order to establish the prevalence of hemoglobin genotype variants and their association with P. falciparum malaria in children receiving postpartum care at Faith Alive Foundation Jos, Plateau State, we study the distribution of these variants. From each sample, thi ...

Clinical features and outcomes of epidermolysis bullosa in thai children: A 20-Year review from a Tertiary Care Center

Published On: November 05, 2022 | Pages: 140 - 146

Author(s): Ekamon Niltem*, Nootchanard Rujimethapass, Chonnakarn Sukhneewat, Wanida Limpongsanurak and Srisupalak Singalavanija

Background: Epidermolysis Bullosa (EB) is a heterogeneous genetic disorder with skin fragility. Only a few cases have been reported in Thailand. This study aims to determine the clinical characteristics, complications, and outcomes of EB stratified by subtype. Methods: A retrospective single-center study of EB patients at the Dermatology Unit, Queen Sirikit National ...

COVID-19 infection in an intensive care unit in Tunisia: Risk factors of mortality

Published On: October 26, 2022 | Pages: 135 - 139

Author(s): Fatma Ben Youssef, Imene Mlouki, Oussama Jawed, Nihel Omri, Mohamed Fekih Hassen, Souheil ElAtrous, Habiba Ben SiK Ali and Sana El Mhamdi*

Introduction: Identification of COVID-19 patients at high risk of mortality is crucial to improve patient management. Our study aimed to identify mortality risk factors at the COVID-19 Intensive Care Unit (ICU), in Mahdia. Methods: We conducted a prospective study including patients admitted to the COVID-19 ICU at University Hospital Tahar Sfar Mahdia (September 2020 ...

Public diplomacy and construction of communicational spaces. The Cuban experience

Published On: December 10, 2022 | Pages: 152 - 154

Author(s): Sunamis Fabelo Concepción*

Global events, such as climate change, the food crisis, or the advance of the COVID-19 pandemic, show that the world needs new integrated dynamic processes. In dealing with the pandemic, exchanges between the scientific community, trained personnel, and the training of professionals, as well as the strengthening of local capacities to deal with the health crisis, the ...
