Antimicrobial prescription pattern in the Deido health district, Douala, Cameroon

Published On: June 24, 2023 | Pages: 038 - 043

Author(s): Charles Njumkeng, Elvis T Amin, Prudence Tatiana Nti Mvilongo, Denis Zofou, Jane Francis KT Akoachere and Patrick A Njukeng*

Inappropriate antimicrobial prescriptions are among the highest contributing factors to Antimicrobial Resistance (AMR). Most low and middle-income (LMICS) countries with high AMR burdens like Cameroon, seldom document information on prescription patterns, whereas this information is crucial in addressing inappropriate antimicrobial prescriptions. This study was theref ...

A model rural rehabilitation service station in China– Evaluation after 5 years

Published On: April 05, 2023 | Pages: 022 - 026

Author(s): HL Qin, JG Ma, SW Chen, CP Li and Ping-Chung Leung*

A simple setup for rehabilitation training was established in 2007 in a rural area of Shanxi Province, China. It made use of an underused facility created for elderly people's leisure time. Simple equipment for rehabilitation training was provided free for the users, and instructions were given by rehab experts, Traditional medical doctors, and social workers. This r ...

How to anticipate and control possible future health crises through foresight approaches using the COVID-19 pandemic crisis?

Published On: June 23, 2023 | Pages: 034 - 037

Author(s): Didier Lepelletier*, Camille Souhard, Franck Chauvin and Zeina Mansour

Prospective studies have evolved towards a more integrated, complex, and diachronic way of thinking about the future. What is the future? It is a set of possibilities, delimited by what we think is impossible (limits of plausibility) and by the difficulty of estimating the degree of plausibility of an event in a V.U.C.A. period. The term V.U.C.A. refers to the four ch ...
